

MDP

Real-Time Business Monitoring and Agile Decision-Making with Excel and Power BI

22th - 23rd May 2026

About BSSS IAS

The BSSS Institute of Advanced Studies (BSSS IAS), an AICTE-approved institution, is engaged in education, research, training, and consultancy activities in the areas of management, sustainable development, rural development, social sciences, etc. It strives to provide a comprehensive platform for growth and empower individuals to thrive in their respective fields. It is one of the best Professional Management Institutions engaged in multidisciplinary activities and has collaborated with Assumption University, Thailand, and Synergy University, Russia, for joint research, training, and management education. The Institute envisions emerging as a top Professional Management Institution in Central India by playing a pivotal role in professional management education in the coming years and adorning a path with an undivided focus on quality education and excellence, thereby placing itself as an institution of national and international importance. Its excellent infrastructure provides an environment conducive to academic activities, professional deliberations, and social interactions.

Its Executive Training Programmes, including Management Development Programmes (MDPs), focus on enhancing managerial, leadership, and analytical skills for executives and government professionals. BSSS IAS aims to play a pivotal role in shaping management education and training in Central India.

Rationale of the Programme

In the digital age, decision-making is increasingly dependent on real-time data and business insights. Organizations are under pressure to make quick, evidence-based decisions to remain agile and competitive. Traditional reporting systems are often too slow to meet the demands of dynamic business environments.

This MDP introduces participants to real-time business monitoring and agile decision-making using Microsoft Excel and Power BI. While Excel remains the most widely used business analysis tool, Power BI adds advanced visualization, automation, and real-time dashboard capabilities. By integrating both, managers and professionals can develop a robust system for business intelligence that supports quick, accurate, and strategic decision-making.

This programme equips participants with practical skills to design dashboards, analyze trends, monitor KPIs in real-time, and enable data-driven decisions, ensuring their organizations stay competitive and resilient in today's volatile environment.

Programme Objectives:

- To provide an understanding of real-time business monitoring and its importance in agile organizations.
- To enhance participants' skills in using Excel for advanced data analytics and reporting.
- To train managers and executives in building dynamic dashboards using Power BI.
- To enable decision-makers to integrate Excel and Power BI for agile, data-driven decisions.
- To develop the ability to monitor KPIs and business trends in real-time.

- To foster data visualization and storytelling techniques for impactful communication.

Programme Components:

- Importance of Real-Time Business Monitoring.
- Advanced Excel Tools for Data Analytics.
- Creating Dashboards in Excel.
- Introduction to Power BI and Data Connectivity.
- Building Interactive Dashboards in Power BI.
- Real-Time Data Monitoring and KPI Tracking.
- Agile Decision-Making with Integrated Excel-Power BI Solutions.
- Real-Time Business Intelligence in Action.
